## Living Things and their Habitats

### Key Vocabulary

Habitat	The natural home or environment of an animal or plant
Micro-habitat	A small habitat
Dead	Not alive
Living/ Alive	Not dead
Ocean	A large area of sea
Rainforest	A large forest with lots of rainfall
Woodland	Land covered with trees.
Environment	The surroundings or conditions in which a person, animal, or plant lives
Shelter	A place to give protection from bad weather or danger
Natural	From nature, not made by mankind
Food chain	Plants and animals dependent on each other for food

### What do I need to know?

- I can explore and compare the differences between things that are living, dead, and things that have never been alive.
- I can identify that most living things live in habitats to which they are suited.
- I can describe how different habitats provide for the basic needs of different kinds of animals and plants, and how they depend on each other.
- I can identify and name a variety of plants and animals in their habitats, including microhabitats.

### Scientific Enquiry...

- I can explore the world around me and raise my own questions.
- I can use simple features to compare objects, materials and living things and, with help, decide how to sort and group them.
- I can observe changes over time and begin to notice patterns and relationships.
- I can gather data, carry out simple tests, record simple data.
- I can use simple measurements and equipment.
